

PITCHING COMPANIES

Arkit

Arkit is a Vancouver-based company on a mission to change how people work, communicate and share using maps. Arkit's web app makes it easy for teams to work together on map-based projects, by combining intuitive mapping features with collaborative project management tools. It gives users a visual, map-based system to plan and organize projects, track location-based information, manage and complete work and share across teams and companies. Arkit powers more informed decision-making, reduces project risk, increases efficiency and makes every day more productive and successful.

Aspect Biosystems Ltd.

Aspect Biosystems Ltd. is a privately held biotechnology company operating at the leading edge of 3D bioprinting and tissue engineering. The company's proprietary RX1 bioprinter is enabling advances in understanding fundamental biology, disease research, development of novel therapeutics and regenerative medicine. In addition to its internal programs, Aspect is focused on strategically partnering with pharmaceutical and biotechnology companies, as well as academic researchers, to create physiologically and commercially relevant tissues. These tissues are used to advance and accelerate the discovery and development of new drugs and therapies.

aspectbiosystems.com

BioMark Diagnostics Inc.

BioMark Diagnostics Inc. is a leader in next-generation cancer diagnostics using the power of metabolomics. The company is developing proprietary, non-invasive, highly accurate solutions to cost-effectively detect cancer early when most cancers can be cured. BioMark's diagnostic platform can be used for measuring a patient's response to treatment and for the ongoing monitoring of cancer survivors. The company's initial focus is on diagnosis for lung cancer, with plans to expand into breast and ovarian cancers.

biomarkdiagnostics.com

BirchBioMed Ltd.

BirchBioMed Ltd. is a clinical-stage biomedical company focused on the clinical evaluation, development and commercialization of anti-scarring drugs, autoimmune therapeutics and novel strategies for transplantation. Our lead drug candidate, FS2, both prevents formation and promotes the breakdown of scars. AI-001, our cell and drug therapy, has reversed certain autoimmune diseases in animal models, including type 1 diabetes, alopecia and psoriasis. These ground-breaking therapeutics aim to displace current treatments and drastically improve the lives of patients.

PITCHING COMPANIES

CareCru Inc.

CareCru Inc. is a "Self-driving", growth platform for dentists and health practitioners. We grow, measure and manage clinics without human intervention.

The CareCru platform automates an outdated, human-centric approach to managing the day-to-day functions of a successful clinic. Using the CareCru platform, corporately owned clinics or individual practices can grow and more effectively manage themselves while dramatically and drastically enhancing the patient experience.

CareCru's practice intelligence reports allow business managers to view the health of their clinics at a single glance.

carecru.com

Certn Holdings Inc.

Certn provides a comprehensive risk and information service to help organizations optimize their risk-based decisions and enhance customer profiles using more than just traditional credit scores and debt ratios. Using their proprietary behavioral analysis tools, extensive databases, artificial intelligence and social profiling, Certn can increase the number of approvals while eliminating default rates and decreasing loan or tenant approval times.

certn.co

Coastal Genomics

Coastal Genomics believes that success in laboratories pioneering new DNA research should not be prone to operator bias. The reality is that some critical processes are left behind, and groups that utilize them are left to complete them via manual efforts.

Coastal Genomics focuses on finding new ways to leverage existing automation to handle these tasks that are tricky to automate. Revenue derived from the sale of associated consumables drives their business model.

coastalgenomics.com

cognitiveVR

cognitiveVR is building analytics and developer tools for the next generation of content - content that will be consumed in 3D spaces, like those empowered by virtual and augmented reality. Their tooling provides the ability to measure, optimize and experiment with recorded behaviors like gaze, user path and events in an interface that looks like Google Streetview - the Tableau for 3D space.

cognitivevr.co

CRM GeoTomography Technologies Inc.

CRM GeoTomography Technologies Inc. (CRM) is a revenue-generating spin-off company from TRIUMF, Canada's national laboratory for particle and nuclear physics. CRM develops and deploys advanced detector technology, and proprietary 3D density imaging and monitoring technologies. In its first market, CRM helps exploration geologists discover and delineate dense ore bodies, reducing cost and waste compared to exploration drilling. CRM's growth will be driven by new applications, especially in monitoring and border security applications.

crmgtm.com

CuePath Innovation

Missing medications is a third largest reason for seniors getting into emergency rooms, which is a nightmare for the entire family. CuePath solves this problem with remote medication monitoring and popular blister packs.

cuepath.io

DiaCarbon Energy

DiaCarbon Energy is a privately owned renewable energy company with operations in Merritt, B.C., producing wood pellets, and soon to demonstrate its commercial scale biomass refinery technology that will produce biocoal (torrefied wood). Biocoal is a clean-burning solid biofuel that is exempt from carbon pricing regimes world-wide, and can be used as a replacement for coal in cement production and coal-fired utilities, where nearly 7-billion tons of coal are consumed annually.

diacarbon.com

Distrix Networks

Distrix SDN routing software embeds on existing Industrial Equipment to extend device life and enhance capabilities by offering simple, secure, remote connectivity in minutes, providing end-to-end encryption without complex network or firewall changes. Distrix helps Hardware OEMs deliver Industrial IoT capabilities today and provide a substantial price advantage in overall capital and TCO costs of Industrial IoT. Customers can realize their Industrial IoT needs faster and with less expense.

PITCHING COMPANIES

Ecoation Innovative Solutions

EIS Crop Sense offers an integrated solution that captures novel data on actual plant state and uses proprietary artificial intelligence algorithms to predict crop health. The result is significantly earlier detection of crop problems, enabling growers to take actions that reduce or prevent crop damage and increase crop value. Early detection of pests and diseases reduces the need for pesticide use and increases food health.

eSportsPools

eSportsPools is a Vancouver-based team leading the way in eSports fantasy leagues and wagering. eSports has hundreds of millions of fans and is the fastest growing sports and entertainment product in the world. eSportsPools currently operates the largest eSports fantasy site, esportspools.com, and will be receiving their remote gaming license in March 2017. Once licensed eSportsPools will begin offering eSports wagering, casino style games and become the number one destination for eSports fan engagement.

esportspools.com

Finn.ai

Finn.ai is a domain-specific AI agent that leverages the latest in Machine Learning specifically for retail banks and financial institutions. Mobile optimized out of the box, the white-label platform ensures the retailer/bank's customers are empowered to connect with their business the same way they connect with their friends. Finn.ai's platform enables retailers and banks to engage and delight their customers with a full suite of services, including day-to-day customer support, budgeting and saving, smart alerts and more.

finn.ai

Foodee Media

Foodee Media is a corporate food concierge that partners with top local restaurants to deliver delicious, quality food to the company lunchroom. Providing comprehensive account management, concierge support, and an online ordering tool, Foodee has set itself apart from other consumer-focused services by catering specifically to corporate clientele and partnering with high-demand restaurants. Since launching in 2012, Foodee has grown rapidly, establishing 4000+ customers, 400+ restaurant partnerships, and delivering 500,000+ meals in 10 North American cities.

food.ee

Fusion Genomics Corp

Fusion Genomics Corp develops highly sensitive and massively multiplex DNA/ RNA Next-Generation-Sequencing based diagnostics and accompanying informatics tools for infectious diseases. We seek to change the paradigm in both patient care and public health. Better patient care is achieved by enabling personalized therapy through genomic data and enabling better drug design/ trails. Effective public health by the simultaneous use of this genomic information to improve disease transmission-models, more accurately predict outbreaks, optimize vaccine development and reduce antibiotic overuse.

PITCHING COMPANIES

PCS Technologies Inc.

PCS Technologies Inc. is a limited company incorporated in British Columbia, Canada operating since 2013 that has a patented, developed-in house process for the catalytical conversion of cellulosic organic waste into stable solid biofuels. PCS stands for polymeric carbon solids, a new form of solid biofuel with modifiable properties, offering a range of industrial applications. PCS Technologies' global vision is to become the world's leading licensor of green waste to energy, by converting common organic industrial and agricultural waste problems in municipalities into profitable green energy solutions.

pcsbiofuels.com

Plurilock Security Systems Inc.

Plurilock has developed deep expertise in the field of Behavioral Biometrics. Its software employs machine learning to develop a unique biometric profile for each individual based on how they interact with the keyboard and mouse on their computer. The profiles cannot be borrowed or stolen. All users on a network are continuously authenticated against their unique profiles. This solves the problem of stolen credentials which are at the root of the majority of cyber attacks.

Visualping

Visualping allows users to select an area on any website and receive an email alert, with a snapshot of the change, when it detects a difference. It's used to track price drops, job postings, concert tickets, out of stocks, monitor online feedback, requests for proposals, competitive intelligence etc. Visualping is in hyper-growth: 500,000 registered users, growing at 25,000 new users a month and revenue is doubling every 6 months. Clients include Google, Apple, Sequoia Capital, Goldman Sachs, The Wall Street Journal, Deloitte, Citigroup, and the FBI.

visualping.io

Vandrico Solutions Inc.

Vandrico is a software company that provides decision-support systems for industrial operations with 500+ field workers. The company's software, Connected Worker, increases safety and productivity by giving front-line workers and managers the information they need, exactly when they need it. Companies like Rio Tinto love it because it's the only real-time 3D visualization and automated communications system that is web-based, quick to deploy and easy to integrate with fully open APIs.

vandrico.com

Velometro Mobility Inc.

If you work, live or play in the city and want flexible personal transportation without the usual torment of urban travel, VeloMetro's Veemo velomobile sharing service liberates you from traffic congestion, the need to have a driver's licence, inactivity, exposure to the elements and the cost of operating a car.

velometro.com

ViewsIQ

ViewsIQ is a medical technology company, digitizing patient samples microscopically to disrupt the pathology practice – the last remaining medical imaging field to go digital. ViewsIQ's Panoptiq system is the first software-based approach to digital imaging that allows seamless integration into a Pathologist's clinical workflow. With Panoptiq, the cost barrier to digital imaging has been removed, permitting clinicians to offer expert diagnostic care to patients virtually anywhere in the world.
